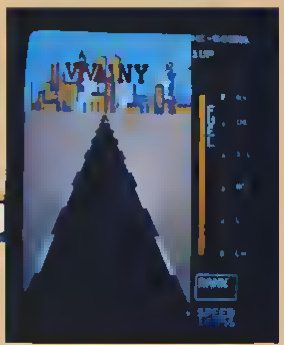
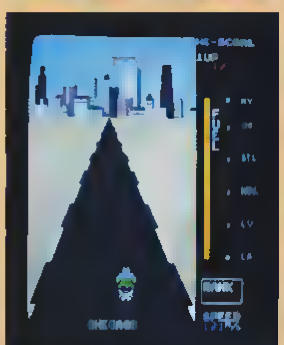
# MOTORACE-USA™





## go east, young man

The player jumps on his motorcycle and takes off on a high speed, cross country race against time, an emptying gas tank, honking cars, slippery slicks, roadways that twist and turn and obstacles that block his path. The race begins in Los Angeles and runs along highways, across deserts and off-roads and through checkpoints in Las Vegas, Houston, St. Louis and Chicago before ending in New York. Ranked 90th at the start, the player must improve his position to earn a higher score by zooming past as many cars as possible.

## flexing reflexes

Fast reaction time, accuracy, skillful maneuvering. All are essential if the player is to pick up points by navigating over narrow bridges, around rocks and sharp, single-lane curves, by jumping across rivers and by whipping onto wheelies. As the player nears each checkpoint, he must dodge the cars that are now coming straight at him with dizzying speed. MOTORACE-USA is revved up and ranin' to go!

## it's a gas

At each checkpoint, the player is awarded bonus scores as well as additional fuel to help compensate for the gas he has used up along the way and lost in collisions with cars and obstacles. Both the bonus scores and the amount of fuel awarded are based upon his rank. A player can also fuel up by picking up gas cans along roadways. Out of gas means out of luck . . . and out of the game. But making it all the way to the Big Apple means another race, this time on a bigger, faster bike for a better chance at improving rank . . . but also for losing control!

## keep on bikin'

MOTORACE-USA gives the player thrills, chills . . . and a 25¢ continued play option. When the game ends, the player's next 25¢ can start the game over from the beginning or continue it from where it left off. The option is his. The profit is yours!
